OPEN AGENT HACKATHON 2026 · WILDCARD

BEZEN
Reply Reader

An agent that explains why a sales reply needs the answer it gets, and proves every claim with the person's own words.

THE PROBLEM

Bots answer fast.
They don't read the person.

A sorter labels a reply **yes / no / question** and sends the next message.
The lead it just burned never shows up in any report.

A REAL REPLY

CUSTOMER

Where did you get my email address?

REGULAR BOT

Great question! Do you have 15 minutes this week for a quick demo?

Ignores the question. Keeps selling. The customer leaves.

BEZEN READS THE SAME REPLY

STATE

intrusion

PROTECTING

Their privacy and control over who has their contact details.

EVIDENCE · VERBATIM

"Where did you get my email address?"

DO NOT

Keep pitching or dodge the question.

SEND

human, with an offer to remove them

THE CRITIC IS CODE, NOT A MODEL

VERBATIM QUOTE

"If it flops my boss will remember"

accepted

PARAPHRASE

"my manager will blame me"

rejected → retry once → else a human

```
✓ accepts a verbatim quote (case and curly quotes ignored) (
✓ rejects a paraphrase presented as evidence (0.8343ms)
✓ rejects empty evidence (0.3685ms)
✓ rejects evidence longer than the reply or a single word (4
✓ never auto-sends to an intrusion or guilt state (0.4506ms)
ℹ pass 5
ℹ fail 0
```

HOW IT WORKS

Two Zetaris file sources, one federated query. Every finding is stored in H-MEM with its source, and fed back the next time the same lead replies.

"WHY DID THE AGENT SAY THAT?" · ONE COMMAND

```
$ npx tsx agent.ts why L008
mem-8
  claim:      Atlas Fitness (L008) is protecting: Their standing with their boss after championing this purchase internally. Evidence: "If it flops my boss will remember.". Do not: Do not brush off the worry with hype or push for a fast commitment beyond the pilot.

BEZEN · A BOT THAT UNDERSTANDS WHO IT'S TALKING TO

Read the person.
Prove it. Remember it.
